

Do you spend time in Guam's waters while snorkeling, swimming, diving, paddling, or fishing? **We need your help** to spot reef impacts around Guam. Attend an Eyes of the Reef classroom or in-water field session* to learn how to identify impacts on coral reefs, such as bleaching and disease, and report them online. You can play an important role in keeping Guam's reefs healthy for future generations. All ages are welcome and no previous experience is required to participate in these free events.

Date	Time	Location
Tuesday, August 8 (Class session)	6:00-8:00 pm	Outrigger Resort
Tuesday, August 15 (Class Session)	5:00-7:00pm	Naval Base Guam** Fleet & Family Center, Bldg. 102
