

Echinoderm Disease

Lesions on sea cucumbers, sea stars, etc.

Abnormal lesions on sea cucumber

Report it online

1

Depth of observed echinoderms with disease

At what depth(s) did you observe the diseased echinoderms? Include units (feet or meters)

Your answer _____

2

Type of echinoderm

For example: balate, sea cucumber, sea urchin, sea star

Your answer _____

3

Genus or species

Refer to <http://www.guamreeflife.com/species-id/inverts/echinoderms/>

Your answer _____

4

Approximate number of echinoderms affected

Your answer _____

5

Lesion description (color, size, etc.)

Your answer _____

Other impacts not listed

- Recreational Impacts
- Vessel Grounding
- Pollution Discharge
- Anchor Damage

Eyes of the Reef

Recreational Use Impacts

Areas with broken live coral fragments can be seen where there's lots of recreational activity

You can report if you see extensive damage from recreational activities (e.g. stepping/standing on coral)

OTHER IMPACT NOT LISTED

1

Depth of observed reef impact

At what depth(s) did you observe this reef impact? Include units (feet or meters)

2

Description of impact

3

Additional information

Do you have any other additional information about this reef impact that might be useful?

4

Do you have photos? Upload photos here: <http://goo.gl/eX57bR>
